AKHIL RAJ

Gurugram, India | 542akhil@gmail.com| 9717411628 | Linkedin | Github

SUMMARY

Full Stack Web Developer with expertise in modern JavaScript frameworks including React, Next.js, and Node.js. Proficient in building responsive, high-performance web applications with strong frontend design skills and back-end implementation. Experienced in API integration, database management, and secure authentication systems.

SKILLS

Frontend: React.js, JavaScript, HTML, CSS, Tailwind, Shadcn
Backend: Node.js, Express.js, MongoDB, Webhook, Sharding
Other: Strong problem-solving, debugging, 3rd party service integration
Tools & Technologies: RESTful APIs, JWT, Swagger, WebSocket, OAuth, Git, Git flow

LIVE PROJECTS LINKS

Medical Assistant Application (MERN Stack)

- Built an AI-powered healthcare application featuring chatbot with voice and vision capabilities

- Integrated hospital finder functionality, mood logging system, and interactive health insights

- Implemented secure authentication/authorization protocols for patient data protection

Social Media Website (React and Firebase)

- Built a full-stack social media platform with user authentication, post creation, and interaction features

- Designed responsive UI/UX with focus on intuitive user experience across multiple devices

- Implemented secure data handling through robust backend development and best security practices

E-commerce Web Application

- Developed a high-performance eCommerce platform with seamless user experience and optimized product discovery

- Implemented secure payment gateways, inventory management, and personalized recommendation systems

- Utilized React.js, Tailwind CSS, and Node.js to create responsive interfaces across all devices

EDUCATION

BTech in Computer Science and Design   **(2022-2026)**

Experience

Web Developer intern at CSRBOX in collaboration with **IBM**   June 2024 – Aug 2024
